PROFILE

Creative and technical Game Programmer and 3D Artist based in Lagos, Nigeria. With 8+ years of experience as a digital artist and 4+ years specializing in game development and systems programming, I build interactive mobile and desktop titles using Unity (C#) and Blender. Skilled at converting high-level game briefs into modular gameplay mechanics, physics systems, and 3D visualizations.

I am passionate about build games and when I'm not building games, I spend a lot of time playing and learning from them. I dive into almost every genre; from fast-paced shooters and cozy simulators to massive open-world RPGs and action-adventures like Elden Ring, Grand Theft Auto, and Assassin's Creed. Always dissecting their core mechanics and systems to see how they are programmed.

EXPERIENCE

Dec 2021 - Present

Game Programmer

Deluxe Creation Studios

Engineered core gameplay loops, physics interactions, and modular systems in Unity (C#).

Shipped multiple published titles on Google Play Store & Steam: Rasta Santa, Grow Farm Garden, Captain EcoGen, Finger Gunner, Dribble Run.

Joined during 6-month industrial training internship and advanced rapidly to full-time Game Programmer.

Oct 2024 - Dec 2024

3D Visualization Artist

GDM Group

Conducting site surveys (recceing) of event venues and recreating locations & decorations in 3D environments.

Designed 3D brand activation spaces, shopping stands, and marketing exhibition booths for client pre-visualizations.

Oct 2022 - Nov 2022

Game Design Facilitator

Gidi Creative Centre

Instructed students in game design principles, core gaming mechanics, Blender 3D modeling, and level design.

2018 - Present

3d Artist

Created digital art, 3D character models, and animations for visual storytelling.

Winner of regional design competitions: Binance x Bundle Africa Meme Wars (2021) and Qlip Meme Contest.

EDUCATION

2018 To 2022

Bachelor of Science: Computer Science

Imo State University

SKILLS & TOOLS

Unity Engine

Blender 3d

C#

Systems Architecture

Visual Scripting

Debugging & Optimization
